CCB, Inc. and 3X Systems Announce Elite Partnership to Benefit Nonprofits

Partnership Provides the Nonprofit Community Affordable Solution's on Award-Winning 3X Systems Remote Cloud Backup System

COLUMBUS, Ohio, April. 15th, 2010 Consistent Computer Bargains, Inc. (CCB, Inc.), a leading provider of affordable technology solutions to nonprofit organizations, and 3X Systems, the automatic offsite backup company for SMBs, today announced that they have signed a strategic partnership giving CCB a unique position to help the nonprofit community address their backup and recovery challenges remotely and affordably.

3X Remote Backup Appliances (RBA) enable businesses to easily deploy a private backup cloud that combines the benefits of high speed on-premise backup with the convenience of online remote backup for disaster recovery - without monthly recurring fees. The 3X RBA® enables small and medium businesses (SMB) to perform their initial backup on premise using the local high speed network, then move the device offsite for continuous remote data protection and disaster recovery. Using its patent-pending locator service, the 3X RBA automatically connects to and backs up data from servers, desktops, roaming laptops and remote offices, regardless of the physical location of these endpoints or of the appliance itself. This unique private cloud architecture keeps data safe, private, easy to recover, and continuously in the possession of the organization.

"In today's current environment, nonprofit organizations have to find ways to do more with less money and resources. By partnering with 3X Systems, we are able to provide our customers with high-quality, remote cloud backup solutions at pricing that's in-line with their IT budgets," said Chris Booth, CEO of CCB, Inc. "We are excited about the opportunity to work with 3X Systems to lower the total cost to nonprofit organizations on their backup and recovery concerns."

"The 3X RBA is specifically designed to provide small and medium businesses with the benefits of an easy to use, cloud backup solution but without recurring and monthly fees. The 3X RBA is a perfect solution for nonprofits that often require the features of an enterprise solution, but need a solution priced with their budget limitations in mind," said Alan Arman, CEO of 3X Systems. "We are excited about the opportunity to expand our market opportunities and better serve the nonprofit market by partnering with CCB, Inc. They are the clear leaders in providing affordable technology to nonprofits and that philosophy is a perfect complement to our mission."
